Qalhat LNG Delivers the 50th Shell Sourced LNG Cargo to Hazira Regas Terminal at Gujarat India

Qalhat LNG delivered safely the 50th Shell sourced cargo to Hazira Regas Terminal in Gujarat, India on 2nd of October. To celebrate the successful and long standing relationship, Mr. Harib Al Kitani, Qalhat LNG President and CEO received the award here in Dubai from Shell's Mr. Mehdi Chennoufi, General Manager Middle East & South Asia LNG.

On this occasion, Qalhat LNG President CEO Mr. Harib Al Kitani said: "It gives us a great pride at Qalhat LNG to participate in this milestone. Our congratulations for the 50th Shell sourced LNG cargo to Hazira Regas Terminal and we wish our partners all the best". He also added "It is a great example to our business partners of our support, commitment and the determination to continue to be partners in excellence".

Qalhat LNG was established in 2003 and owns the third train in the LNG complex in Qalhat in Wilayat of Sur, Sultanate of Oman. The Government of the Sultanate of

Oman owns 46.84 per cent equity while Oman LNG has 36.8 per cent, Union Fenosa Gas 7.36 per cent and Itochu Corporation, Mitsubishi Corporation and Osaka Gas of Japan each own 3 per cent of the company, making it a truly international venture.

The Hazira Project is a joint venture between Shell and Total and includes an LNG receiving and storage terminal within a purpose built all-weather, deep-water port. The world-scale LNG terminal together with infrastructure is laid out for a capacity of 5 million tons per annum of LNG and is one of the largest greenfield foreign direct investments in the energy sector in India. The Hazira terminal is situated 120 nautical miles north of Mumbai and is strategically located with access to regional and national pipeline grids.
